  - 157 9.1 **Seating Die:** installation and adjustment
  - 161 9.2 **Bullet Seating:** bullet seating depth determination
  - 186 9.3 **Processing:** putting it all together
- 

\* **When it matters**, there are “**Overview**” headings for topics that either precede or follow some chapters. In the interest of compacting each chapter into focused discourse, these additional pages add insight without clogging the essential text. I've tried to keep distractions to a minimum. It's an overall understanding that matters most, because that's when you learn to anticipate the effects, influences, and sometimes dangers of changes. It's mostly “what” that provided the knowledge, but the “why” matters to the depth of understanding.
