MO EVERYTHING + WHERE TO FIND IT

MAINTENANCE

191	10.0 Handling: ammo storage and more
195	11.0 3-Firings-In: cartridge case maintenance, plus case life

ADVANCING + OPTIONS

213	12.0 Precision Concepts: taking it farther, and farther, and farther
	Segregation 214 Outside Case Neck Turning 223
	Bullet Sorting 227 Ballistic Coefficient 230
	Dead Length Seating 232 Barrel Twist Rate 236
	Coated Bullets 236 On accuracy... 240

246	13.0 Common Problems: and hoping you never need this chapter
249	14.0 Progressives: auto-mation

LOAD DEVELOPMENT *(the most important part of this book)*

254	Pressure: Preface + Introduction
257	15.1 Pre-Loading: getting ready to test
259	15.2 Pressure Evaluation: staying safe, always
269	15.3 “The Load”: finding your own unique recipe
278	15.4 Getting There: Incremental Load Development method
282	Tubb On Testing: good company pays a visit
289	15.5 Load Recipes: Recommendations from my notes
	When it's (we're) all said and done, you write your own loading data manual. Complete with all case dimensions, loaded round dimensions, and cartridge content. This is the information you use to complete this accomplishment of becoming a handloader. Pre-done publications are only (ever) guides to general information.
