

XX End... NOT NEARLY ALL THE NAMES IN THE INDUSTRY, BUT THESE ARE IN THIS BOOK, AND ON MY SHELVES

WHERE TO BUY EVERYTHING — SOURCES AND RESOURCES

Actually, it's not the end. It's really the beginning... The beginning of an endless need for these folks. Tools last a good long while, especially those on my "better" and "best" lists, but components, it's a steady diet.

ONE-STOP-SHOPS

These offer pretty much all you ever need: components, tools, everything.

These are both big outfits with great service, good prices, huge array of reloading tools and components. There are others, many others. If you're shopping for price, shop around. These sorts of outlets pretty much all carry the same things, with a few proprietary items to their own. I tend to go with the ones I named due to good experiences.
